

# EMSCULPT®

## Revolutionary treatment to build muscle while shrinking fat

At the Bella Viságe, we are constantly reviewing new and emerging technology, so that we can bring the best to our patients.

**M**ANY PEOPLE WOULD PREFER NONSURGICAL OPTIONS, AND WE HAVE ALWAYS KEPT THIS IN MIND. JEANNA PARKER AND HER STAFF CAN HELP STEER PATIENTS THROUGH THE OFTEN CONFUSING AND CONSTANT INFORMATION STREAM TO DETERMINE WHICH PRODUCTS, PROCEDURES OR TREATMENTS WILL HELP EACH INDIVIDUAL ACHIEVE HIS OR HER GOALS.

The latest device in the arena of body sculpting is a totally new concept, because in addition to helping the patient lose body fat, it also tightens and builds the underlying abdominal muscles.

The EMSculpt procedure is the world's only procedure that simultaneously addresses both muscle and fat. It can be used on the abdomen and/or the buttocks, for a nonsurgical buttock lift. The EMSculpt procedure is backed by 9 independent multi-centered studies from across the United States. These studies show an average of 16% increase in muscle mass and an average fat reduction of 19% in the abdominal

treatment area. The EMSculpt uses High-Intensity Focused Electro-Magnetic technology, causing "supramaximal" contractions of the muscles, which causes the muscle fibers to multiply and grow, and the surrounding fat to be disrupted and to die off.

EMSculpt is the only procedure to help both women and men build muscle and sculpt their body.

This technology is rapidly becoming the world's number one FDA-cleared, non-surgical procedure that's proven to help you lose inches with every visit. Each treatment session takes approximately

30 minutes. This treatment is great for abdomen, arms, thighs, buttocks and more. Our staff, so far, has shown a 1-2" reduction in waist size, only 1 month after the four sessions ended, and an impressive toning of the silhouette.
